

**Donated by D’N’R Sporting Goods to the NSSA  
“your Fishing & Hunting Specialists”**

The ICE 45 ice fishing flasher uses 3-color fiber optic flasher with a center dial LCD display engineered for peak performance in temperatures as cold as -20&degF. The LCD includes digital depth and allows the flasher to automatically adjust the depth scale, eliminating the guesswork and estimation of depth scale overlays. Rely on Humminbird ice flashers to find your spots and keep your cooler full.
