Bearings

The Steelheader runs on 2 ABEC 3 shielded stainless steel ball bearings. For an additional cost these can be substituted for ABEC 7 bearings upon request.

Warranty

Islander offers a limited 2 year warranty against manufacturer defects.

Features

Dymondwood® Handles Every IS centre-pin float reel comes with two Dymondwood handles. Black Delrin handles available on request.

Free-spool Button The free-spool lever allows the user to completely disengage the reel clicker. The button affords freespool operation for casting and a slight drag, when engaged, for those who use this feature. The clicker also prevents line from spooling off while travelling from one fishing location to the next.
