Shimano Bait Casting 6 foot one piece rod

The Compre series rods feature IM8 graphite blanks with low-profile Fuji® Concept Hardloy® guides. Each aluminum-oxide guide is diamond-polished and permanently mounted to the frame. A Fuji® exposed-blank reel seat provides direct contact with the blank for the sensitivity needed to detect subtle bites. In addition, each is equipped with shaped, Grade-A cork handles and a cork composite butt cap.

Pinnacle Extant Baitcast Reel ELP10

SKU: ELP10

The EXTANT reel incorporates a fully adjustable six-arm centrifugal brake that provides the necessary additional braking force to help prevent backlash and provides greater casting accuracy and distance. Equipped with a 4 bearing system, and unlimited anti-reverse system, this reel will provide years of smooth, long, accurate casts and instant hook-setting power. The lightweight and strong aluminum spool is machined from a solid piece of Aluminum and has been cut to exact dimensions for reduced weight and proper balance. The high performance drag built into this reel has been designed to provide a smooth, even flow of line under constant pressure. The EXTANT reel is constructed from one-piece metal frame design to maintain extreme rigidity. Weight-8.7oz., 3BB+1RB, line capacity 12/165.
